Progress since April 10, 2017

14% complete

AG Divide Tasks Among the Class

100% complete

CC Create VM Box

0% complete

AG Load All Required Software / Packages onto Monsoon

50% complete

KN Separate the data into Field & Filter

0% complete

KN Reduce the data [Bias Subtract, Flat Field]

0% complete

CT Extract Known Asteroids

0% complete

Perform Aperture Photometry on Known NEAs

0% complete

Determine Rotation Rate / Axial Ratio Properties

0% complete

Draw Conclusions

0% complete

Format / Submit All Astrometry to MPC & LCDB

0% complete

AG/MZ Write Code to Find Unknown Asteroids Using Blinking

0% complete

AW/NS/CC Write Code to Determine Rotation Rate / Axial Ratio

0% complete

Extract Unknown Asteroids

0% complete

Perform Aperture Photometry on Unknown NEAs

0% complete

Determine Rotation Rate / Axial Ratio Properties

0% complete

Draw Conclusions

0% complete

Format / Submit All Astrometry to MPC & LCDB

0% complete
